SYDNEY MIRA is a singer/songwriter hailing from Massachusetts. She successfully released her debut single, BAD, in September 2023 and is excited to announce the release of her 2nd single "Bite" on October 13, 2023. "Bite" is a moody, sensual alt-pop song about someone who appears innocent but is actually a femme fatale. The melody is sexy and slinky while the lyrics emphasize power and control.

SYDNEY MIRA's music is influenced by the darker pop sounds and creative lyricism of musicians such as BANKS, Julia Wolf, and Taylor Swift, coupled with the ethereal stylings of Ellie Goulding and Astrid S. SYDNEY MIRA's lyrics are taken straight from her journal – honest, close to the heart, occasionally sarcastic, and confessional in their vulnerability. What we experience emotionally is layered and intricate, and those feelings and thoughts are intertwined in both darkness and light. These constant contradictions of emotion are what draw SYDNEY MIRA to create songs about the tangled parts of life, delving into topics such as toxic relationships (whether romantic or not), mental health, loss, love, and empowerment. As a passionate, fiery, and strong-willed Sagittarius, SYDNEY MIRA is always striving to break free of limitations, and songwriting is her escape.

**DISCOGRAPHY:** BAD (Sept. 15, 2023)
